Pass along one week

Use two Android phones. The hub hosts. The second phone receives and reopens the week offline.

Bring to the practice

Two charged Android phones, a trusted signed APK, and one signed week file.

Write down the title of the exact week you plan to send.

1 Start the hub

Open Share this church’s library. Start hosting on the local hotspot, or use church Wi-Fi. On the second phone, join that network and open the address shown by the hub.

2 Sideload the APK

Download the APK from the trusted hub. Open it in Files and allow that source to install apps if Android asks. Open The Well on the second phone.

3 Send the selected week

Open the chosen week on the hub and tap Share this week. Send its signed .cpjson file, then use Import files on the second phone. Check the week number and title.

4 Reopen in airplane mode

On the second phone, switch on airplane mode and turn Wi-Fi off. Force-stop The Well from Android app settings, reopen it, and open the same week. Read the title and a line aloud.

Pass when the second phone reopens the exact week after the app restarts.

If Wi-Fi transfer fails, repeat the handoff with the same files on a trusted SD or USB kit.

Lead one weekly meeting

Share the passage and questions in a language the group can discuss together.

5 min	Welcome, pray, and check in on last week’s next step.
10 min	Read the passage aloud twice. Invite someone to retell it.
20 min	Discuss the four questions below.
10 min	Name one next step, pray for each other, and confirm the next meeting.

Four questions to use each week

1. What stood out to you in this passage?
2. What does it show us about God and about people?
3. What would it look like to respond to this passage in our lives this week?
4. Who can we encourage or serve, and how can we pray for each other?

Train the next leader

Ask a second leader to practice one discussion, share the week to a new device, and show that it opens offline. Agree on the date they will lead and when you will check in afterward.

Field notes

Date and place _____

Hub and receiving phones _____

Week number and title _____

Airplane-mode result _____

Next leader and meeting date _____
